First class rated Balco Symphony Residence, which is operated by Balcomalta, will start operating on 1st July 2006. The residence is situated very close to the University of Malta, and all major schools in Sliema and Gzira.

Balco Symphony is very ideal for students that wish to have a comfortable stay when visiting Malta for a long term. It is conveniently situated within walking distance to Sliema Seafront – Malta's best tourist resort where one will find all the necessities such as bars, shopping malls as well as a Bus station that links Sliema to the rest of the island directly.

All 17 brand new rooms are for single occupancy. We understand very well that long stay students that come to study, especially on internship or at the university, enjoy socialising with other in-house students yet love their own privacy. The rooms are carefully designed and having the facilities of 90 litre fridge, hair dryer, direct dialling telephone (VoIP) bilingual sat TV, radio and balcony or window. All rooms are air-conditioned (cooling and heating) at a minimal charge.

Complementing this property, there is 2 fully equipped kitchens and dining area for in-house guests at no extra charge. The residence does not have a curfew and all residents are given a front door key and may enter the Residence at any time. Non-residents are not allowed on the premises after 10.00 pm as well as not allowed to enter the rooms at all times.

The boarding house has a roof terrace with a distant sea view, luggage store for late departures and elevator from 1st floor to all bedrooms. All rooms are cleaned once a week, towels are changed twice a week and garbage is collected from the rooms. Laundry and internet service is also available to all guests at a charge.

Our host visits the residence every day, to make the general cleaning including garbage collection as well as to attend to any information that guests would like to have.
